# Looking for Migration Solutions?

**Then look to Pathway Pacific Pty Ltd.**

**We've got your Tool and Data Porting requirements covered.**

Many businesses and enterprises get nervous when comes the time to migrate. Understandable enough. You've invested heavily in your third and fourth-generational language (3GL and 4GL) applications. Not to mention your databases, which frequently constitutes years of hard work and irreplaceable information - information and material to which you constantly refer and which is the life-blood of your business.

You want a migration that will not leave your invaluable resources inaccessible for any length of time, that will not disrupt your business flow, and that will come in on time and within budget – and with no nasty surprises. That's where Pathway Pacific Pty Ltd comes to your assistance.

## HP e3000 Migration Solutions

Pathway Pacific Pty Ltd has been appointed Hewlett-Packard's sole Platinum Migration Partner in the Asia Pacific region to solve all your migration concerns – without headaches.

We provide end-to-end, mission critical solutions so that you not only make a hassle free transition, but you make this move knowing that the future value of your business is appreciating because you've made all the right choices.

Your 3GL and 4GL language applications will not only be transferred to the carefully selected, and most comprehensive platform for your businesses future growth – but also, if desired, they will arrive 'enhanced' – with more highly attuned user interface, and leveraged Web and Windows capabilities.

And your databases? Pathway Pacific again has your interests protected. From a simpler 'replication' which minimises application code changes and side-steps the need to introduce new structural changes – to the more

complex 'cleaning and refining' method, where application codes change as they neatly adapt while the application database accesses the new structure – Pathway Pacific will make sure you're making all the right moves.

## ■ APPLICATION MIGRATION

### **Transoft:**

Transoft has earned its reputation as a leading international provider of application transformation, integration, assembly and analysis solutions. The Transport Intelligence Adapters will identify and safeguard your critical business application functions through migration, and can build new and scalable, integrated (e)business applications. Transoft offers a complete migration toolset.

### **Ordina-Denkart:**

Ordina Denkart's HP3000 migration solution ViaNova 3000 transfers entire customer-developed environments from HP-3000 to Open Systems like HP-UX and Linux without having to discard essential applications. They also offer a whole series of new features and technologies for you to consider including an ASP model for migration. Ordina Denkart's unique 'charge by line of code' remuneration system is the ultimate in 'client friendly'.

### **Neartek:**

Needing to port your applications and data to open environments such as Unix, Windows, or Linux? Neartek's AMXW migration tool is Hewlett-Packard endorsed, and offers comprehensive technical and financial features to assure the durability and security of your applications. Neartek's migration tools are packaged and sold as a complete toolset for your migration ease.

### **Hewlett-Packard's Asia Pacific Program**

#### **Includes:**

Hardware and Software Programs:

- hp e3000 to hp-ux conversion kits
- trade-in discounts
- loaner systems
- mission critical and enterprise hp-ux upgrade offers.

(For details on the hardware and software programs listed above, please contact your local sales representative or reseller.)

## ■ DATABASE MIGRATION

### **Speedware:**

DBmotion is the perfect choice for those who want to replicate their database environment on another platform. Without the help of a tool – and it has to be the right tool – the whole database migration process can be high risk and time-consuming. DBmotion saves on stress and your valuable hours, because it automates most intricacies involved in the process.

### **Taurus:**

BridgeWare is the first real-time data capture and cross-platform heterogeneous replication product for a HP3000 data source. The product combines all of the capabilities of DataBridger with Quest Software's SharePlex detect-change technology. This combination makes BridgeWare the first product capable of bulk or transaction-by-transaction cross-platform data replication for HP3000 sources.

### **Marxmeier Software AG:**

Eloquence is a database that allows HP3000 users to emulate their TurbolImage databases under HP-UX, Linux or Windows. The TurbolImage schema structure and item types are directly supported within the product, and it offers an intrinsic mapping mechanism that allows code to remain unchanged. Eloquence is an ideal solution for Cobol, PowerHouse (Cognos) and Speedware users.

## ■ CHOOSING YOUR MIGRATION VENDOR?

Migration needs vary from one enterprise to the next. That's why Pathway and Hewlett-Packard have selected the most representative and comprehensive vendor 'toolkits' available. The factors of time, available resources (both human and technical), budget and your specific migration-end requirements are crucial in this selection process.

Let Pathway Pacific assist in your choice of Solution Vendor.

# HP e3000 Migration Solutions

## Portfolio of Migration Services

- **Migration Assessment:**

Pathway Pacific will outline the time-frame and resources required for your transition.

- **Planning and Analysis:**

We will provide a comprehensive and step-by-step analysis and strategic report to plan your migration.

- **Project Management:**

Let Pathway's expertise guide your team in the right direction to successful project completion.

- **Implementation:**

You choose. Pathway Pacific can expertly assist with all aspects of your migration – or offer a few extra resources to backstop your more critical areas.

- **Database Porting:**

Pathway Pacific has real experience. We know, first hand, the complexities of database migration and we are ready to assist with yours.

- **3GL Migrations:**

Protect your valuable 3GL legacy investments. Pathway Pacific can show you how.

- **4GL Migrations:**

Happy with your 4GL applications? With our ability to enhance and extend your existing applications, Pathway Pacific can add even more value to your Speedware, Transact or PowerHouse migration.

- **Migrations Technical Support:**

We are easily accessible, and have the expertise to immediately solve any challenge you may encounter. Breathe easy – our experts are only a phone call or email away.

### **Environments:**

3GL applications created in languages such as Cobol, Fortran, Pascal, RPG. C. and Basic, as well as 4GL applications created with Transact, Cognos or Speedware-based products.

### **Platforms:**

Microsoft Windows, Linux  
Leading UNIX servers: HP-UX, AIX and Sun Solaris,

Australasian Address:  
Unit 8, 281 Pacific Highway,  
North Sydney NSW 2060 Australia
